Differential Pressure Gauges & Manometers

Dwyer series 2000 Magnehelic Gauges have easy to read 100mm dials that indicate positive, negative or differential pressure. The gauges are manufactured from die cast aluminium to resist vibration, shock and over pressure.

The gauges require no maintenance except for occasional zero setting by opening the plastic vents turning and adjusting the external front screw.

Optional:

Optional Accessory kit A605 contains a mounting panel with screws, two static pressure tip with compression fittings, two 1.5m lengths of aluminium tubing and two molded pressure vent valves.

ORDERING INFORMATION	
- RAINBOW MAGNEHELIC GAUGES -	
Product Code	Details
MAG 0-60	Magnehelic Gauge 0 – 60Pa
MAG120	Magnehelic Gauge 120Pa (A2-Z1-120Pa)
MAG250	Magnehelic Gauge 250Pa
MAG30/0/30	Magnehelic Gauge -30 / 0 / +30 Pa
MAG60	Magnehelic Gauge -60 / 0 / +60 Pa
MAGNA-500	Magnehelic Gauge 0 – 500 Pa
ACCESSORIES:	
MAGCOVER	Magnehelic Gauge Cover, Powder Coated, White
MAGKIT	Mag A605 Installation Kit
