

HOSPITAL GRADE SURFACE DISINFECTANT & PROTECTANT

DISINFECTS & PROTECTS FOR UP TO 24 HOURS

SIQURA® 75HG Hospital Grade Surface Disinfectant is a simple and effective way to kill bacteria and protect surfaces continually for up to 24 hours.

SIQURA 75HG will destroy bacteria on the treated surface. Allowing the product to dry will also coat the surface with a microscopic protective layer for continuous microbial protection.

It is ideal for use around children, pets and plants.

24 HOUR HOSPITAL GRADE DISINFECTANT & PROTECTANT

AUSTRALIAN TGA CERTIFIED

SIQURA is certified by the Australian TGA (Therapeutic Goods Administration) as a hospital grade surface disinfectant that kills > 99.999% of bacteria, and forms a long lasting, invisible barrier which defends surfaces against microbial attack (and biofilm formation), continually for up to 24 hours. The Siqura active is US EPA listed. SIQURA Hospital Grade Surface Disinfectant meets or exceeds EN1276 and AOAC 991.47/48/49 hard surface carrier test.

BONDS TO APPLIED SURFACES

SIQURA Hospital Grade Surface Disinfectant is applied wet, onto clean dry surfaces. As it dries, it forms an organo silane matrix of electrostatically charged spikes that bond to a diverse range of surfaces and substrates. Unlike all non-bound disinfectants, SIQURA does not leach from (or leave) the treated surface, and it does not deplete in microbial efficacy or promote microbial resistance.

CONTINUOUS NON-STOP PROTECTION

Through a bio mechanical process, the electrostatic charge interacts with the bacterial lipid layer, resulting in permanent destruction of bacterial cells. Because the organo-silane isn't consumed in the disinfection process, it remains continually ready to defend treated surfaces against contamination and bio film formation.

BROAD-SPECTRUM PROTECTION

SIQURA Hospital Grade Surface Disinfectant has been tested against a wide range of pathogens include Escherichia Coli [ATCC 8739], Pseudomonas aeruginosa [ATCC 15442], Staphylococcus aureus [ATCC 6538], Enterococcus Hirae [ATCC 10541], Salmonella choleraesuis [ATCC 10708] and odours causing bacteria. SIQURA Hospital Grade Surface Disinfectant meets or exceeds EN1276 and AOAC 991.47/48/49 hard surface carrier test.

HUMAN FRIENDLY / ECO FRIENDLY

SIQURA is friendly to humans, pets and our environment. SIQURA contains no chlorines, bleaches, carcinogenic or endocrine disruptive compounds, and in final life, SIQURA breaks down to form harmless organic compounds. It is non-staining, pH neutral and non-corrosive, making it suitable for a wide variety of healthcare and commercial applications.
